Subject: [DIV24] *PHE* Lecture Series: Right Or Wrong? - Moral Psychology, Social Neuroscience, and Theory Of Mind

Dear DIV24 colleagues,

Below is an invitation for a talk-show style 1hr lecture for Psychological Humanities and Ethics:

Right Or Wrong? - Moral Psychology, Social Neuroscience, and Theory of Mind ([link here](#))

Presenter: **Dr. Liane Young**, director of The Morality Lab at Boston College - Associate professor of psychology and neuroscience at Boston College

Host: Mookie Manalili, LCSW (myself)

Respondents: Live Q-and-A's by you, our audience members

When: Thursday, April 8th, 7-8 pm (ET) via Zoom

"What makes morality unique is the experience of moral judgment as a flash of intuition - or feeling good vs bad. But... underneath that feeling is a complex psychological structure..." In this Psychological Humanities and Ethics lecture, Dr. Liane Young will discuss the field of moral psychology, aspects of the theory of mind, and reasoning in moral judgments informed by social contexts. As social creatures, we spend a lot of time thinking about the mental lives of those around us, both for social interaction and for moral evaluation. Dr. Young will explore the broad question of how social context shapes these processes, from a social neuroscience perspective."

Our lectures are free and open to the public (or \$25 for 1.0 CE for APA, LMHC, and LI/LCSW's). Looking forward to thinking deeper and practicing more ethically with you all,

--

Pax Christi,

Michael Mookie C. Manalili
