Racially and ethnically minoritized populations and tribal communities often face preventable inequities in health outcomes due to structural disadvantages and diminished opportunities around health care, employment, education, and more. Federal Policy to Advance Racial, Ethnic, and Tribal Health Equity analyzes how past and current federal policies may create, maintain, and/or amplify racial, ethnic, and tribal health inequities. This report identifies key features of policies that have served to reduce inequities and makes recommendations to help achieve racial, ethnic, and tribal health equity.
