

Start date: January 1, 2026

Location: Boston/Cambridge, MA; plus travel within the U.S. and Canada

Duration: 1 year

Salary: consistent with [HMS Postdoc Office guidelines](#); minimum: \$72,000

Supervisor: Joseph P. Gone, PhD, Professor of Global Health and Social Medicine and Professor of Anthropology; Director, Harvard University Native American Program

Research Fellowship in Indigenous Community Well-Being

The Project

The Department of Global Health and Social Medicine seeks a postdoctoral fellow to support and advance emerging action-research projects dedicated to Indigenous Partnerships for Community Well-Being. Many Indigenous peoples in the USA experience overwhelming distress stemming from legacies of conquest and dispossession that have led to unremitting poverty. These problems include mental health inequities such as high community rates of trauma, addiction, and suicide. And yet, conventional clinical approaches to helping individuals with psychological distress and disability are not always well-tailored for Indigenous communities. By engaging in participatory fashion with knowledgeable and resilient Indigenous community partners, the Indigenous Wellness project will assess the relevance, efficiency, and effectiveness of mental health and psychosocial helping services and, together with community partners, re-imagine and re-design such services toward greater cultural consonance, therapeutic benefit, and community self-determination. In-depth consultation with community leaders, health experts, and other local knowledge carriers—and circulation of lessons learned through routine academic publication and community dissemination—will be essential to the success of these endeavors. Contributions to scientific knowledge may include formal outcome evaluations of innovative services, as well as more basic research that will elucidate Indigenous experiences and understandings of health, healing, and well-being. In sum, the signature contribution of this activity entails the reflective, collaborative, and documented development of innovative interventions for mental health problems in (post)colonial Indigenous settings in the USA.

Responsibilities

Under the supervision of Prof. Joseph Gone, Faculty Director of the Harvard University Native American Program, and in collaboration with regional and national Indigenous community partners, the fellow will assume mentored responsibility for: (1) advancing research projects, analyzing associated data, writing manuscripts, and submitting these for publication; (2) supporting existing partnerships and cultivating new partnerships toward efficient and effective action-research dedicated to mental health services innovation; (3) contributing to the logistics of community-engaged action-research, including ethics review, financial reporting, grant preparation, etc.; (4) consolidating a relevant network of community-engaged researchers and Indigenous knowledge keepers who are committed to promoting innovative Indigenous wellness projects; and (5) supervising, orienting, and training project students, staff, and volunteers who contribute to these efforts. Ability to manage virtual meetings and to travel as required to project sites, whether regional or national, is required.

Qualifications

Applicants must have a doctoral degree in a field relevant to this project (e.g., psychology, medical sociology, medical anthropology, social work, public health). Other desirable qualifications include:

Record of scholarly publication, including first-authored scientific journal articles

Expertise in research design, including: interviews, focus groups, thematic content analysis, systematic reviews, intervention development, and program evaluation

Experience working in or collaborating with Indigenous communities in the USA

Prior supervision of research team and/or coordination of community research activities

Current knowledge of mental health problems and services in the USA

To apply:

Point your browser to <https://academicpositions.harvard.edu/postings/14924>. At this site, submit the following items: (1) cover letter stating long-term career aims, interest in the project, and suitability for the position, specifically referring to the criteria listed above; (2) curriculum vitae; (3) two or three relevant publications; and (4) contact information for three potential references. No need to supply reference letters; we will contact your references if we pursue your candidacy. **Application deadline: 11/3/2025.**

Other information:

This project is expected to be ongoing. The research fellow position will be hired for one year, with the possibility for renewal depending on continued funding and exemplary performance.
