

## New Meeting Host Procedures for CSC Starting July 27

**From:** Ilene Serlin PhD

Working in the field of mental health, it's pretty easy to feel stretched thin. The Clinician Support Collaborative was formed as a resource for fellow therapists to take an hour and be able to come up for air. Formed by the [American Psychological Association](#) Interdivisional COVID-19 Task Force's Professional Support for Psychologists Working Group, the Clinician Support Collaborative is a space to join and connect with one another amidst the many shared traumas that our community is currently experiencing.

Access is free and available to mental health providers.
